

Report Remove Tool for naked images and videos (IWF)

The Internet Watch Foundation (IWF) has created the world's first tool to help children and young people get naked images of themselves removed from the internet.

The Report Remove Tool can be accessed through the Childline website. IWF analysts will then review the content and create a unique digital fingerprint known as a hash, before sharing it with tech companies to help prevent it from being uploaded and shared.

For more information and to access the Report Remove Tool, go to: <https://www.childline.org.uk/info-advice/bullying-abuse-safety/online-mobile-safety/remove-nude-image-shared-online/>
